

Silver Citrate favors the cell regeneration and skin renovation processes. It stimulates the immune system, normalizes metabolism and kills over 650 species of pathogenic bacteria. It is known to be one of the best natural antiseptics. Silver inhibits pathogenic microflora while being loyal to useful bacteria and human organism

#1 SILVER CITRATE APPLICATION:

- Preservation and storage of drinking water
- Production of environmentally friendly disinfectants
- Cosmetics (skin care, baby care, wound care, hair care, deodorants)
- Household chemicals with antibacterial properties
- Crop storage (processing of vegetables and fruits)
- Preservation of food products
- Medicine (immunostimulants, healing of wounds, burns)
- Manufacture of antibacterial tissue and products made of it (uniform, personal protective equipment)

Silver Citrate is an aqueous solution of organic silver of high concentration. It is used as an additional component and the main active ingredient

SILVER CITRATE STRUCTURE

TECHNICAL DATA

Appearance - Clear liquid

Physical Condition - Liquid

Color - Colorless, Transparent

Odor - Slight

pH - 2-5

Concentration (Ag) - 1000 ppm

SPECTRUM OF ANTIBACTERIAL ACTION

Effective against to all groups of sanitary indicative microorganisms: Gram-positive and Gram-negative bacteria (including E. coli, staphylococcus, streptococcus, Pseudomonas aeruginosa, Salmonella), Mycobacterium tuberculosis, viruses (including influenza virus, hepatitis B, polio etc.). It has anti-fungal properties (including candidiasis, tinea, etc.), sporicidal and antiparasitic (eggs and larvae of worms, geohelminthes, intestinal protozoa)

ORGANIC COMPONENTS ONLY

silver, citric acid, water

PATENT PROTECTION

Produced in Ukraine (Kiev)

Certified and recommended by the Ministry of Health

Silver Citrate - ANIBACTERIAL INNOVATION

1

SAFETY ANTIBACTERIAL

Silver Citrate has no toxic substances and vapors. Disinfectant based on Silver Citrate has the highest safety class). Only pure water evaporates from the surface after processing. It is the first drug to fight infection, which can be applied without poisoning

2

RELIABILITY

Silver Citrate has a prolonged action (up to 200 days!). Invisible silver nano protection film forming the premises already after several processing. It provides reliable and permanent protection against harmful bacteria, fungi and viruses

3

UNIVERSALITY

Silver Citrate replaces all range of specialized products: from disinfection of the barracks and the hospital, to clothin protection and conservation of drinking water in hot climates

4

ECONOMY

Silver Citrate has an accumulative effect. Regular usage of the drug can significantly reduce the frequency of disinfection and there is no need to use other special expensive products

5

TESTED

Effectiveness of **Silver Citrate** and specialties products based on Silver Citrate has been tested **during 10 years** in microbiological laboratories and on largest industrial enterprises

Silver Citrate - ANIBACTERIAL INNOVATION

HARVEST

- Disinfection of premises and vehicles
- Protection of seed from fungus, mold and bacteria
- Increasing the preservation of the crop - Preservation of seed

STORAGE

- Protection of elevators, warehouses, refrigerating chambers
- Disinfection of ventilation systems (filters, air ducts, etc.)
- Preservation of crops, reduction of rot during storage
- Disinfection of fodders, disinfection in the production of feed

GROWING

- Disinfection in incubators, and premises for rearing young animals
- Regular disinfection in the presence of livestock. Protection against epidemics
- Disinfection of drinking water
- Increased immunity and weight gain in livestock

PRODUCTION

- Regular disinfection of equipment and all types of surfaces
- Disinfection of equipment and storage facilities
- Disinfection mats (personnel) and disinfecting barriers (motor transport)
- Disinfection of water and air
- Disinfection of uniforms and shoes - Neutralization of unpleasant odor

PRODUCTS

- Disinfection of production equipment - Final disinfection of food products
- Preservation of products before packing
- Storage and conservation of drinking water

WE LOOK FORWARD TO COLLABORATING!
